MOVE THE WORLD FORWARD MITSUBISHI HEAVY INDUSTRIES GROUP

EDiA EM

FB14-20(C)N2(T) Series

ELECTRIC COUNTERBALANCE

1.4 – 2.0 tonnes

INTELLIGENT PERFORMANCE INCREDIBLE PRODUCTIVITY

Smart. Safe. Agile. EDiA EM is a lot of truck in a compact package. Legendary Mitsubishi Forklift Trucks engineering, exceptional ergonomics, and cutting edge technology — like AutoBoost and Sensitive Drive System+ (SDS+) — combine to make EDiA a favourite of drivers and businesses alike.

WHEN RELIABILITY IS EVERYTHING...

MITSUBISHI FORKLIFT TRUCKS

EDiA EM

FB14-20(C)N2(T) Series

ELECTRIC COUNTERBALANCE

1.4 – 2.0 tonnes

BRAKES

- **Electronic magnetic brakes**
  These don't rely on brake pads, eliminating associated maintenance and the risk of brake dust and contamination.
- **Intelligent Cornering System (ICS)**
  The truck senses the angle of a turn and reduces speed early for maximum stability and accurate, positive cornering.
- **Automatic parking brake with hill hold**
  The truck stops automatically when the accelerator is not engaged, preventing rolling on ramps. No need to remember to use a handle or switch.
- **Energy regen safety lights**
  When the truck is regenerating energy the truck slows down faster than usual when the throttle is released. Brake lights blink to warn traffic behind of the increased slow down.

DRIVE

- **AutoBoost**
  Acceleration and torque boost functions provide more power when needed, such as on ramps.
- **Sensitive Drive System+ (SDS+)**
  Our next-generation driver-assist system for increased safety. Traction and mast performance are independently managed according to steer angle and the velocity of foot and finger controls to match driver reaction speeds.
- **ECO mode**
  This mode optimises energy efficiency and gives smoother performance. Ideal for long shifts, training, new users, and part-time users.
- **PRO mode**
  This mode maximises performance parameters, giving full control to more experienced operators in intensive situations.
- **Electric differential lock**
  When activated, both front wheels spin simultaneously, giving the truck better traction and control in slippery conditions. (Option)

ELECTRICAL AND CONTROL SYSTEMS

- **Integrated Presence System 2 (IPS2)**
  Truck and mast will not move if the operator is not seated, and provides a seat belt warning light and parking brake alarm.
- **Straightforward component layout**
  Fast, easy access to key areas, reducing downtime and cutting routine servicing bills.
- **Custom settings**
  Through the multi-functional configuration software TruckTool, the truck can be fine-tuned by a service engineer to meet any application or scenario.

FORKS AND MAST

- **Adaptive Lift Control (ALC)**
  Allows truck to remain stable with fewer movements when lowering loads from high heights.
- **Passive Sway Control (PSC)**
  Minimises mast sway, especially in high lifts above 3m.
- **Strong, high-visibility mast**
  Free-lift cylinder structure is optimised with hoses over chains for outstanding visibility.
- **High-durability hoses**
  Resistant to wear and wide-ranging temperatures — ensuring minimal downtime and disruption.

FRAME AND BODY

- **Bright LED working lights**
  Illuminate load and surroundings. Installed in mast structure, but do not light the structure or cabin to minimise reflections and increase visibility.
- **Sideways battery change**
  Integrated sliding rollers offer quick and easy battery change for multishift operations. (Option)
- **Safety Zone**
  Red lights are projected on the floor to the sides and rear of the truck to give nearby pedestrians a clear idea of the safe distance to keep.

HYDRAULICS

- **Precision tilt and side shift**
  This provides easy, fine control — making difficult movements safer and faster.
- **Load sensing hydraulic system**
  Load handling functions react similarly to different load weights.

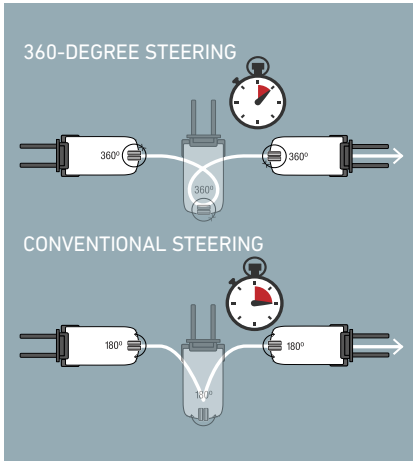
EDiA EM
FB14-20(C)N2(T) Series
ELECTRIC COUNTERBALANCE

1.4 – 2.0 tonnes



OPERATOR COMPARTMENT AND CONTROLS

- **F2 button**
  This simple thumb control integrates additional key controls without taking your eyes off the load. Options include clamp release and automatic tilt centring.
- **Spacious, open cabin**
  The room means that operators of various sizes can benefit from a range of comfortable driving positions.
- **Unparalleled 360° visibility**
  An optimised mast, wheel, dashboard and counterweight design maximises visibility to load, forks, front and rear wheels giving safe, confident operation in tight spaces.
- **Optimised pedal position**
  All pedals are in the most ergonomic position, shaped and angled so each pedal will feel familiar to use and easy on the ankles.
- **Clear, informative display**
  Full colour and easy to read from all angles. even in direct sunlight. Perfectly positioned for at-a-glance reference, without reducing all-round visibility.
- **Highly responsive steering wheel**
  Automatically optimises power to steering for consistently smooth operations — regardless of speed or work intensity – for maximum control, comfort and safety.
- **Dual joysticks**
  Dual joysticks offer simultaneous functions for lift and tilt, and settings can be customised to customer requirements. (Option)
- **Multifunctional Ergologic Joystick**
  This intuitive and highly ergonomic joystick controls seven different functions, including lifting, lowering, reaching and tilting.
- **Long handle bar**
  Aids safer entry/exit.
- **Narrow inclined dashboard**
  This enhances the driver's perception of surroundings — giving even greater visibility to the front and sides of the truck.
- **Flat floor**
  No obstructions and plenty of room for the operator.
- **Extra-large low step**
  Entry and exit is easy and safe, thanks to a high-grip surface.

STEERING SYSTEM

- **360-degree steering**
  The operator can keep the truck in constant motion — saving seconds on every turn. (Option on 3-wheel models)
- **Four Wheel Steering (4WS)**
  Front axle drive motors turn in separate directions for better grip and precise handling. The rear axle steers through a full 100°, with dual drive motors for instant, smooth turning on the spot and no initial 'push'. This offers excellent manoeuvrability in tight spaces. (4-wheel models)
- **Perfectly weighted steering**
  Optimal steering wheel size with a light but firm feel gives confidence and manoeuvrability at all speeds.
- **Mini steering wheel**
  Allows operators to maintain a relaxed driving position and better view, ideal for longer shifts. (Option)

OPTIONAL LI-ION BATTERY SYSTEMS

MAKE YOUR FORKLIFT GO EVEN FURTHER

Tried, tested and proven in the field,lead-acid batteries have been the long-standing choice for companies employing electric lift trucks. However, with long charging times, demanding maintenance requirements, the need for extra batteries, and high risk of operator misuse, day-to-day use can be a challenge.

Fortunately, there's a new battery system on the block: Li-ion from Mitsubishi Forklift Trucks.

Designed to meet your business' demands — including multi-shift (24/7) operations — without the need for spare batteries, our high-performanceLi-ion battery system is up to 30% more efficient than lead-acid counterparts. Plus, it's virtually error-proof, thanks to its ultra-low-maintenance design which prevents cell damage.

- **Gas-emission free and space efficient operation**
  with no need for air ventilation.
- **Exceptional high battery and charger efficiency**
  State-of-the-art technology delivers up to 30% more power efficiency than lead-acid batteries.
- **Maintenance-free design**
  No need for daily checks and water re-fills. This reduces the risk of operators damaging cells and reducing their lifetime. Needs a full charge each week to activate cell balancing.
- **No need for spare batteries or charging room**
  You can save both space and costs in multi-shift applications, maximising profitability.
- **Quick charge capabilities**
  Just 15 minutes is all your battery needs to keep your truck going for a few more hours. It only takes 1 to 2 hours to fully charge a completely discharged battery.
- **Higher sustained voltage**
  This gives more consistent lifting and driving performance — particularly noticeable towards the end of a shift.
- **Multiple safety features**
  This includes circuit protection, deepdischarge and overcharge protection, and individual cell temperature and voltage monitoring.
- **On-the-go performance and monitoring**
  The system's integrated monitoring system has an easy-to-read display unit.
- **Wide choice of battery and charger capacities**
  The most suitable power supply can be matched to the exact requirements of a specific application.

Clean Li-ion batteries are ideal for sensitive environments such as those in the food or packaging industries.

Fully integrated Li-ion battery

Features a sophisticated CANbus communication and an automatic ON/OFF synchronization between battery and truck. Battery level, notifications and alarms are integrated into the truck display, to secure clear and easy overview for the truck operator.

For more information on Li-ion please visit our website

mft2.eu/lion

Li-ion battery option is available in selected regions.

Deluxe cabin

Continuing improvement may lead to changes in these specifications

WHEN RELIABILITY IS EVERYTHING...

EDiA
THE ELECTRIC DIAMOND

The family name EDiA appears proudly on our award-winning range of electric forklift trucks.

The reputation that Mitsubishi Forklift Trucks enjoys for endurance and reliability has likened them to the quality and enduring value of a diamond.

Like any product bearing the "MITSUBISHI" name our materials handling equipment benefits from the tremendous heritage, huge resources and cutting-edge technology of one of the world's largest corporations – Mitsubishi Heavy Industries Group.

Engineering spacecraft, jet planes, power plants and more, MHI specialises in those technologies where performance, dependability and superiority decide your success or failure...

So when we promise you quality, reliability and value for money, you know it's a guarantee we have the power to deliver.

That's why every model in our award-winning and comprehensive range of lift trucks and warehouse equipment is built to a high specification – to ensure it keeps working for you. Day after day. Year after year. Whatever the job. Whatever the conditions.

YOU'LL NEVER WORK ALONE

As your local authorised dealer, we are here to keep your trucks working – through our extensive experience, our technical excellence and our commitment to customer care.

We are your local experts, backed by efficient channels to the entire organisation of Mitsubishi Forklift Trucks.

No matter where you are, we are close by – with the capability to meet your needs.

Discover how Mitsubishi Forklift Trucks give you more from your local authorised dealer or when you visit our website www.mitforklift.com

Performance specifications may vary depending on standard manufacturing tolerances, vehicle condition, types of tyres, floor or surface conditions, applications or operating environment. Trucks may be shown with non-standard options. Specific performance requirements and locally available configurations should be discussed with your distributor of Mitsubishi forklift trucks. We follow a policy of continual product improvement. For this reason, some materials, options and specifications could change without notice.
