Introduction

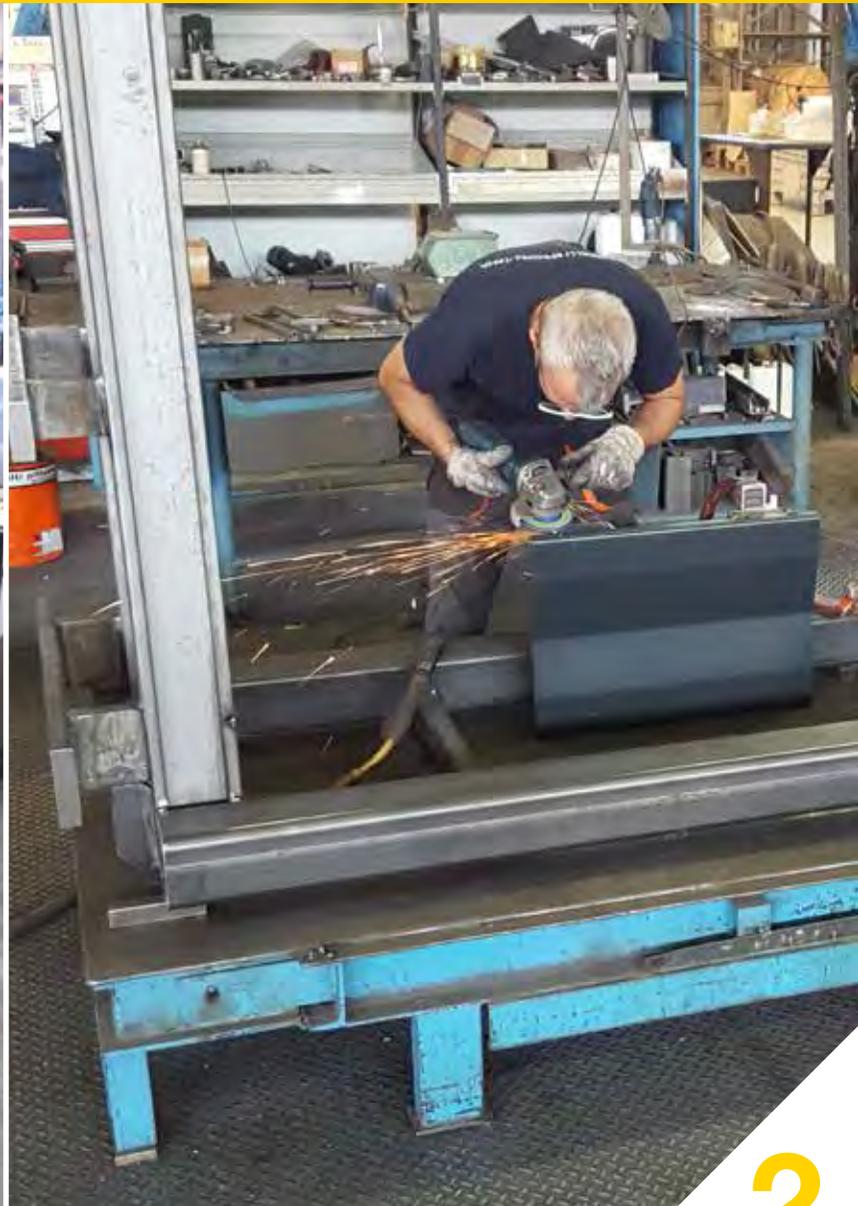

Robur is an established company that delivers tailor-made stacking solutions to a wide range of customers and industries worldwide. With over 65 years in business, the company name which is Latin for oak, mirrors our core product values, strength and reliability.

The Robur range of bespoke handling equipment consists of pallet and forklift trucks, powered and counterbalanced stackers, work positioners and reel handlers. Our ability to design and manufacture to our customers' needs not only upholds our strong position in engineering but ensures we deliver a comprehensive service. Robur machinery is backed up by a professional and experienced maintenance and parts service, guaranteeing peace of mind to customers for routine maintenance and breakdowns.

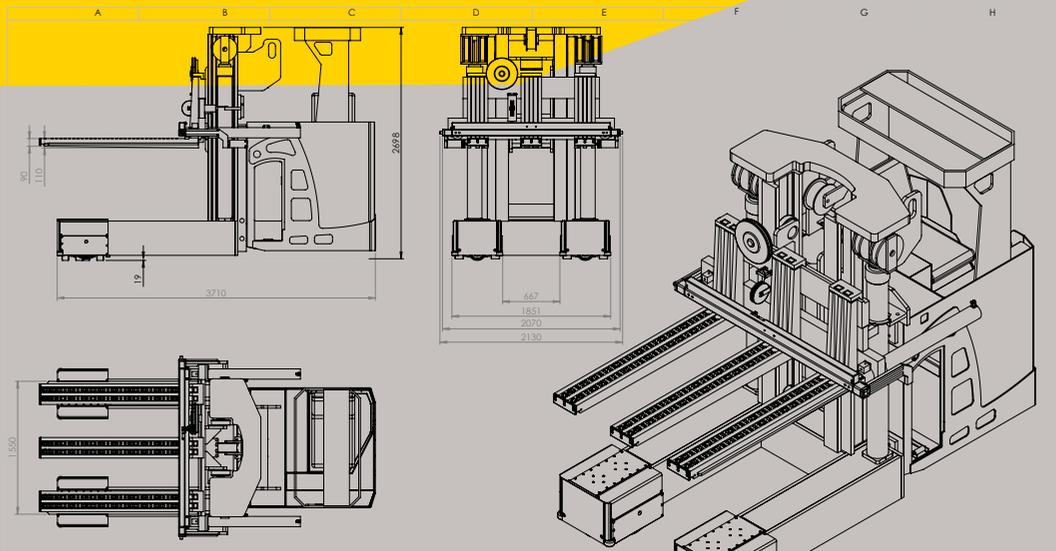

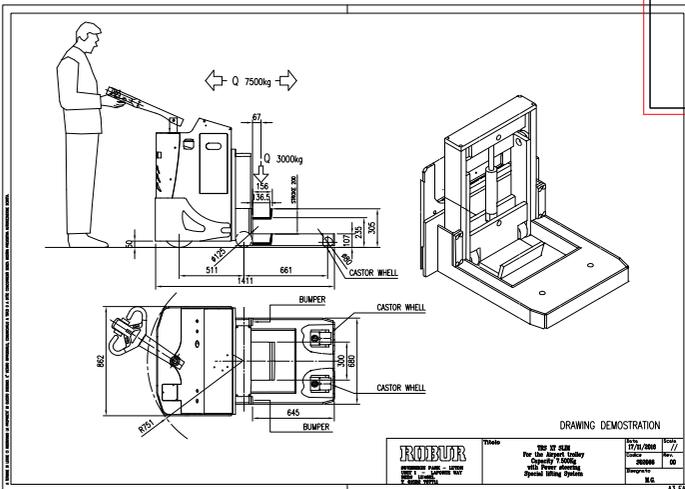

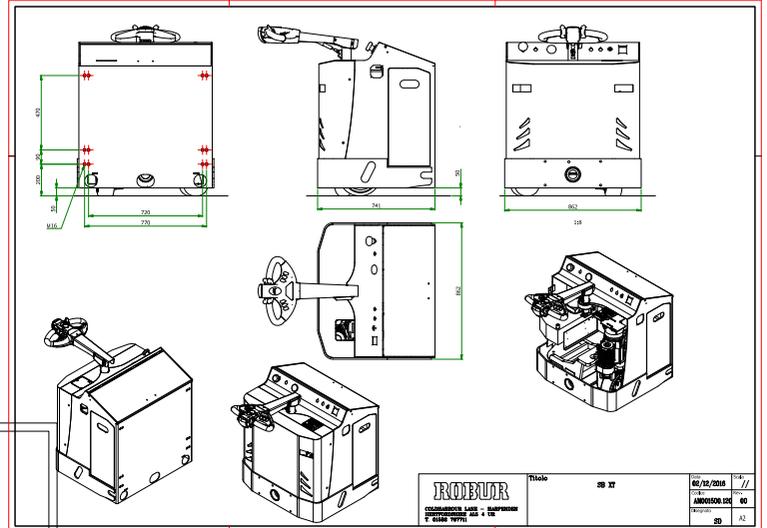

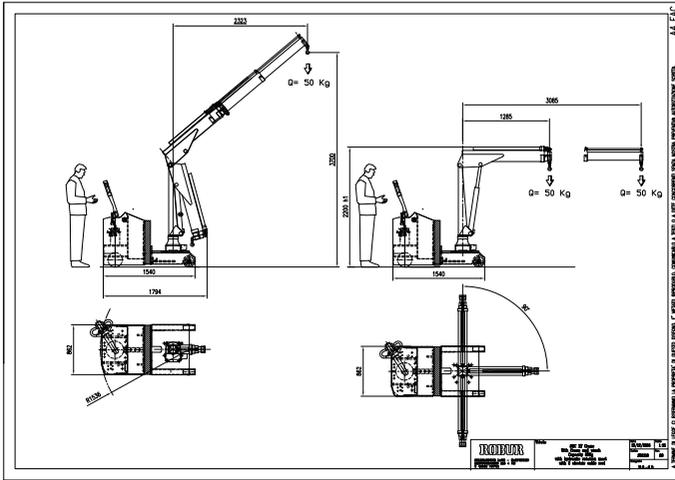

Robur understands that health and safety is a main priority for many businesses, which is why we have invested in a comprehensive training school for our trade partners' engineers. Attendance ensures operatives are fully compliant and industry certified.

Robur is a company that is continually innovating whilst maintaining core values of customer care and service, it is the name to trust for all your material handling requirements.

R&D to design

As a leading manufacturer, Robur has total control over design and build of all products. Our decades of experience developing bespoke trucks for our customers and their specific requirements is not only a key strength, but provides confidence for those working with the Robur brand.

Counterbalanced Stacker

300kg – 3,500kg

Multiple mast, carriage and attachment options.

The Robur range of Counterbalanced Stackers are highly-versatile and robust for any indoor application. Evolved from a traditional forklift truck, the Counterbalanced Stacker is perfect for manoeuvring goods into tight spaces. With no protruding arms or legs, this machine can transfer loads up close to pallet aisles and shelves.
